- Heated warehouse and office
- Overhead lighting
- Loft area for storage or work space
- Available welding, fab, crane and fork truck services
- Direct access to deep water
- Work vessels available onsite

Ocean Tech Services' high bay workshop is conveniently located less than five minutes off Exit 13 of the Garden State Parkway in Avalon, New Jersey and roughly one nautical mile from the Townsend Inlet Bridge and access to the Atlantic Ocean. The indoor and outdoor work areas are a prime staging site for a wide range of marine operations such as monitoring systems commissioning, deployment and maintenance, offshore windfarm development support, survey and dive operations, and other marine services.

Various marina services can be scheduled as needed such as welding and fabrication, travel lift and fork lift services. Additionally, OTS can assist with arranging vessel services through Northstar Marine, Inc. which operates the 92' *R/V Commander* and 50' *Northstar 4* as well as a number of smaller vessels.

The OTS shop and our equipment assets can be made available at daily, weekly, and monthly rates. Please contact OTS to discuss your project needs and schedule a site visit.
